

State Grant Background

THE STATE GRANT PROGRAM HELPS STUDENTS AFFORD THE COLLEGES THAT BEST MEET THEIR NEEDS.

The State Grant program:

- > Targets low- and middle-income families
- > Holds down additional borrowing
- > Supports all college options
- > Invests in the state's economy by building the future workforce
- > Has statewide impact

71,900 students from across Minnesota receive a State Grant.

And they go to all kinds of colleges.

MINNEAPOLIS COLLEGE OF ART AND DESIGN

206 State Grant recipients were on campus last academic year — that was **29 percent** of all MCAD undergraduates.

The average State Grant award at MCAD was \$5,439.

In total, **more than \$1.1 million** in State Grant awards were made to MCAD students.

"I'm able to pursue my goal of expanding our appreciation for nature and the environment through my work. All of this wouldn't be possible without receiving the State Grants, which have helped financially so I can focus more on schoolwork than having to worry about making ends meet."

2022 State Grant Agenda

We ask Governor Walz and the Legislature to prioritize college students through the Minnesota State Grant program, which supports students who need it most.

New State Grant investments help two out of five Minnesota resident college students.

REQUEST:

THE SHARE OF EXPENSES THAT THE STATE GRANT FORMULA EXPECTS STUDENTS TO COVER SHOULD BE LOWERED FROM 50 TO 46 PERCENT OF COLLEGE COSTS.

Legislation that would do this with a \$42 million investment has been introduced: Senate File 2894 and House File 2859.

BENEFIT:

1. Larger grants

- Help the 66,000 students who would already receive State Grant awards.
- Looking at all students, full- and part-time, the average grant increase would be \$635.
- For full-time students, grant increases would range from \$670 to \$1,170.

BACKGROUND:

It makes sense that students should help pay for their college education. But the student share shouldn't be unreasonable. The State Grant program has outdated assumptions about what a student can afford to pay. Fixing this is important; it will help students stay in college and earn their degrees.

Lower-income students have been hit the hardest during the pandemic. Last year the number of Pell Grant recipients enrolled in college in Minnesota fell by 12 percent, while there was a drop of only 2 percent for those who did not receive Pell Grants.

Investing in the State Grant program makes the difference for college students, their families — and our state's economy.
